

1. git clone -b url
2. git branch
3. change
4. git status 查看当前操作
5. git clean -f (删除未监视的文件)
6. git add ...
7. git commit -a or git commit -m "message..." //push anything changed
8. git remote rm origin (第9步的清空操作)
9. git remote add origin --> github address
10. git pull --rebase origin master
11. git push -u origin master

git删除远端的目录文件

- 1.git rm -r --cached ...
- 2.git commit -m "destory"
- 3.git push

mac双开Eclipse

- 1.cd /Application
- 2.open -n Eclipse.app

查看端口

- 1.ifconfig|grep net
- 2.lsof -i tcp:"port"
- 3.telnet 127.0.0.1 8080
- 4.netstat -nat | grep 3306
- 5.nc -w 10 -n -z 127.0.0.1 8000-9000

打开端口 -->只需要监听了这个端口即可打开

Eclipse中目录结构:

右键 -->Build Path -->use as source folder
